

Sustaining access and affordability through change

Small changes in Medicaid and DSH metrics can have major implications.

As Medicaid and DSH conditions evolve, covered entities face growing risk to both program sustainability and patient access. Accelerate Pharmacy Solutions helps pharmacy leaders quantify exposure, evaluate timing and options, and plan proactively – aligning financial strategy with patient care delivery.

Pressures you may be facing

- Eligibility uncertainty:** Adjustments in DSH calculations can materially impact 340B eligibility, increasing uncertainty
- Medicaid and reimbursement shifts:** Shifts in Medicaid utilization and reimbursement can compound financial strain across pharmacy and safety-net programs
- Margin volatility:** Changes in eligibility or reimbursement can quickly alter program economics
- Compliance complexity:** Evolving audit expectations and interpretations increase governance and regulatory risk
- Operational strain:** Managing potential disruption alongside competing priorities strains already-constrained teams

How we can help

- Assess exposure:** Model the potential impact of Medicaid and DSH sensitivity across eligibility and patient access
- Evaluate options:** Compare strategic paths – maintaining 340B eligibility, preparing for transition, or optimizing within uncertainty – based on risk profile and timing
- Improve controls:** Strengthen audit readiness, reconciliation discipline, and data transparency
- Plan the response:** Align operational actions and financial decisions before conditions force reactive decisions
- Augment capacity:** Provide experienced support to execute complex planning without adding fixed overhead

A flexible response to 340B evolution

Assess and prepare	Stabilize economics	Strengthen operations	Protect access
340B Consulting	Specialty GPO	Pharmacy Management Services	Patient Access and Affordability
Quantify eligibility impact and exposure	Evaluate transition scenarios if eligibility changes	Extend operational capacity amid resource constraints	Protect therapy access amid funding changes
Assess DSH/Medicaid risk and implications	Protect purchasing economics and margins	Stabilize complex services under reimbursement pressure	Expand affordability, prior authorization, and benefit support
Strengthen audit readiness, controls, and governance	Minimize disruption through strategic timing analysis	Improve performance and cost-to-serve as conditions evolve	Align financial decisions with mission driven outcomes
Establish decision triggers and response plans	Enable confident leadership decision-making amid uncertainty
