

## Retail inventory management

Through our partnership with OrderInsite™

As your trusted industry partner, we want to share valuable solutions and services that may not be available directly from AmerisourceBergen that can meet your needs and keep your business at best-in-class pharmacy in your community.

For that reason, we've partnered with OrderInsite to help pharmacies manage, monitor, and master their prescription drug inventory.

Right-fill your shelves with our sophisticated, customizable supply chain management solutions, superior market insights and unmatched customer service.

### Inventory management

- Forecasting to set inventory levels
- Automatic preferred drug selection to optimize pricing
- Store-to-store transfer to better manage slow-moving inventory
- Consistent customer-defined cycle counts

### Compliance

- Monitor, identify, and alert for potential diversion
- Easy-to-use documentation tool if diversion is suspected
- Track and trace solution to store DSCSA data for all suppliers in one location

### Intelligent procurement

- Automate purchasing, saving time plus ensuring purchase of the right contract items
- A centralized view of all purchasing activity, providing the visibility you need to ensure compliance with supplier commitments
- EDI connectivity to all suppliers and manufacturers (supported files include 850, 855, 856, 832, 810)

Flexible and scalable solutions

Unapologetically customer focused

Trusted by 7,000+ pharmacies

OrderInsite's full Inventory Management suite is available to any pharmacy that uses one of the following pharmacy software vendors and maintains perpetual inventory or has a willingness to do so\*

- Computer Rx
- Rx30
- PDX / EPS
- Liberty
- Suite Rx
- QS1 (partial integration)
- Pioneer Rx

\*OrderInsite can integrate with other systems, but would need the prospective pharmacy to facilitate the discussion about building a new interface.

### OI Order\*\*

Auto generates daily orders based on forecasts. Single portal for all suppliers

### OI Buy

Optimize purchasing through improved compliance with Wholesaler / Supplier commitments

### OI Replenish

Set order quantities based on forecasted demand

### OI Exchange

Optimized available inventory through store-to-store transfer

### OI Count

On hand quantity validation using data driven methodologies

### OI Analyze

Robust decision support and integrated supplier returns

\*\*For pharmacies electing not to use their pharmacy system ordering module.

## Maximize efficiencies, productivity, profit, and ROI

- Efficient inventory management and control with relevant data at your fingertips
- Manage and control prescription drug inventory with advanced analytics
- Experience a 15-20% drop in inventory levels while improving customer service
- Spend less time managing reorder points with robust order management tools
- Take advantage of an inventory management solution for AmerisourceBergen purchasing plus all customer manufacturers / wholesalers
- Ensure the right meds are on the shelf when the customer requests a fill

**I have truly been impressed with the results of OI's inventory management system. It allowed us to lower our inventories between \$30,000 and \$150,000 per store. Our instock levels improved, which increased customer satisfaction and decreased our cost to dispense and our inventory turns improved from 8-10 to 18-24 per year. The decision to use OrderInsite as our inventory management system has proven day in and day out to be one of the best decisions we have ever made.**

—Russell Pelzel, RPh, The Dansley Group, Hometown Pharmacy
