

Understanding Cencora's Waiver, Exception, or Exemption (WEE) and product report access

Understanding Cencora's Waiver, Exception, & Exemption (WEE)

With DSCSA exemptions ending, certain manufacturers and items in the U.S. supply chain fall under the Waiver, Exceptions, or Exemption (WEE) designation. A Waiver, Exceptions, or Exemption (WEE) is an FDA-granted approval that allows Authorized Trading Partners (ATPs) in the U.S. supply chain to be exempt from specific DSCSA requirements. Cencora maintains a list of items under an approved Waiver, Exceptions, or Exemption (WEE), which can be exchanged in the U.S. supply chain without adhering to the enhanced drug distribution and security requirements while still remaining compliant with DSCSA regulations. Additionally, Cencora has been granted its own Waiver, Exceptions, or Exemption (WEE) approval, enabling us to dynamically add manufacturers or National Drug Code (NDC) experiencing data issues that could otherwise disrupt product access.
