Vaccine A	
<b>SHIPMENT</b> <i>3 separately acquired components (mixed on site)</i> <ol style="list-style-type: none"> <li>Vaccine <ul style="list-style-type: none"> <li>Direct to site from manufacturer (on dry ice)</li> <li>Multidose vials (5 doses/vial)</li> </ul> </li> <li>Diluent <ul style="list-style-type: none"> <li>Direct to site from USG (at room temperature)</li> </ul> </li> <li>Ancillary supply kits <ul style="list-style-type: none"> <li>Direct to site from USG (at room temperature)</li> </ul> </li> </ol>	<b>ON-SITE VACCINE STORAGE</b> <i>Frozen (-70 °C ± 10 °C)</i> <ul style="list-style-type: none"> <li>Must be used/recharged within 10 days</li> <li>Storage in shipping container OK (replenish dry ice as needed)</li> </ul>
Vaccine B	
<b>SHIPMENT</b> <i>2 separately shipped components</i> <ol style="list-style-type: none"> <li>Vaccine <ul style="list-style-type: none"> <li>To central distributor (at -20 °C)</li> <li>Multidose vials (10 doses/vial)</li> </ul> </li> <li>Ancillary supply kits <ul style="list-style-type: none"> <li>Direct to site from USG (at room temperature)</li> </ul> </li> </ol>	<b>ON-SITE VACCINE STORAGE</b> <i>Frozen (-20 °C)</i> <ul style="list-style-type: none"> <li>Storage in shipping container OK (replenish dry ice as needed)</li> </ul> <i>Refrigerated (2-8 °C)</i> <ul style="list-style-type: none"> <li>Must use within 7-14 days</li> </ul> <i>Room temperature</i> <ul style="list-style-type: none"> <li>Must use within 6 hours</li> </ul>
<b>ORDERS</b> <i>Large quantities, to large administrators</i> <ul style="list-style-type: none"> <li>Minimum order: ~1,000 doses</li> <li>Maximum order: ~5,000 doses</li> </ul>	
<b>PRIORITIZED POPULATIONS AND ANTICIPATED VACCINE ADMINISTRATION SITES</b> <i>Health care professionals (incl. LTCF staff) – health care clinics + health care occupational health clinics + public health closed temporary mass vaccination clinics + mobile clinics</i> <i>Essential workers (specifics TBA) – hospital occupational health + hospital clinics + public health closed temporary mass vaccination clinics</i>	<b>ADMINISTRATION</b> <i>2-dose series (28 days between doses)</i> <ul style="list-style-type: none"> <li>No on-site mixing required</li> <li>Administer by intramuscular (IM) injection</li> </ul>

CDC documents released 8/28

*“Some vaccine products, such as those with ultra-cold temperature requirements, will be shipped directly from the manufacturer.”*

*“Jurisdictions should consider partnering with the private sector... to provide vaccine in closest proximity to the prioritized populations as possible, given the limitations with the product.”*

9/1

*Phase 1a “Jumpstart Phase”: High-risk workers in healthcare facilities; First Responders*

*Phase 1b: People of all ages with comorbid and underlying conditions that put them at ... higher risk; Older adults living in congregate or overcrowded settings.*

*Retail should not expect to see vaccine until at least January*

# Remdesivir Update

- The Emergency Use Authorization (EUA) for Remdesivir was extended on Friday, August 28, 2020
- About Remdesivir & the EUA
  - Investigational drug that went through National Institutes of Health (NIH) clinical trial
  - FDA issued EUA allowing administration to hospitalized patients with COVID-19
  - EUA allows for distribution and use by licensed health care providers
  - EUA updated/expanded August 28, 2020
  - Candidates for treatment must be hospitalized COVID-19 patients:
    - adults/children
    - with suspected or laboratory confirmed COVID-19

# Product & Supply Chain Updates

## ■ GlaxoSmithKline

- While respiratory product inventory position has improved since March, we expect GlaxoSmithKline products **Advair** and **Flovent** will remain on allocation likely until the end of the calendar year to continue to manage constrained inventory
- Currently, GSK products represent about 23% of the overall branded omits at AmerisourceBergen

## ■ KALETRA® from AbbVie

- Moved from wholesale to specialty distribution ~ 6 months ago to better manage a surge in demand
- Will be returned to wholesale distribution channel next week (September 12) as AbbVie has successfully rebounded their inventory

- **Remember!** You can always utilize the **Key Shortage Report** and **Drug Shortage Notes**, both of which are available through reporting in ABC Order and ABC Passport

# Reminder: Enhanced Aggregated Allocation Functionality

## Old Functionality

- The previous functionality allowed customers to identify a group of accounts for which they would like to combine purchasing potential for allocated product(s), rather than setting allocations at the individual customer account level. **The functionality was limited to products on Market Shortage allocation.**

## What do you have to do?

- If you are already signed up for aggregated allocation, **no action needs to be taken.** We added the AmerisourceBergen allocation type to your aggregated groups starting August 28.
- If you would like to sign up for aggregated allocation, please reach out to your AmerisourceBergen rep, and they can help you complete the enrollment.

## New Functionality

- Aggregated allocation is now available to **combine purchasing potential for both Market Shortage and AmerisourceBergen allocated product.**
  - Reminder:
    - Market Shortage allocations are typically defined by the manufacturer
    - ABC Allocation items might be placed on allocation proactively by AmerisourceBergen, for example, if we are experiencing higher-than-usual demand, if product availability is erratic, in times of API disruption, etc.

# Q & A

*Please submit questions directly in the Skype window*

We are united in our responsibility to create healthier futures.
