World Courier

# evo DV10 Smart Shipper

The forefront of pharmaceutical  
packaging innovation

From World Courier's own Climate Optimization  
Research and Engineering (CORE) Labs

## About evo DV10

evo dv10 LN2 smart shipper simplifies the transport of critical biologic shipments and advanced therapies requiring cryogenic temperatures. Movable without a pallet, tiltable up to 90°C, with extensive on-board monitoring and extended temperature hold times, evo shippers are easy to handle – reducing the burden on hospital sites, and improving your supply chain flexibility.

## Why choose evo DV10

Innovative. Reliable. Connected.

### Secure the transport of live cells

Uncompromised integrity, coupled with reliable access to critical payload information.

### Rapidly intervene in case of disruption

Extensive remote monitoring of temperature, location, and condition.

### Improve cryogenic supply chain flexibility

Maintains range for up to 10 days. No need to palletize. Tiltable.

### Get peace of mind

Held to the same exacting standards as the rest of the World Courier ecosystem.

## All-encompassing logistics

Turnkey solutions designed by experts for experts

### Start packing immediately

evo dv10 LN2 smart shipper is pre-conditioned to the required temperature.

### Reliably maintain range

Maintains range for up to 10 days.

### Leave returns to us

We'll refurbish and reuse the unit elsewhere in our network.

# Key Features

## Designed for maximum flexibility

- Easy to handle.
- Designed and optimized for CGT shipments on international lanes.

## Tracking capability

- Integrated GPS tracking.
- Integrated temperature tracking: Payload and external.
- Integrated condition tracking: Geo-Fence, humidity, lid opening, tilt/orientation, battery charge, 3G signal strength.

## Sustainability impact

- Reusable packaging, no disposable materials.
- Returned on consignment, for minimal empty journeys.

# Specifications

	DV10
System type	Smart shipper
Temperature stability & qualification	<b>240 hours (upright)</b>
Temperature ranges	Cryogenic: -120°C to -196°C
Dimensions	79x37x37 cm (outer)
Volumetric weight (tare)	18kg
Sustainability impact	Reusable
Certification & approvals	ISTA 7E

\* Including floor rack

**AmerisourceBergen**

World Courier

04  
reasons  
to choose World Courier

**1 Consultative approach**

Precisely tailored solutions for your individual requirements.

**2 Process expertise**

First- to last-mile, delivered to exacting standards.

**3 Comprehensive range of solutions**

The best market, and our own innovations, across all temperature ranges.

**4 Designed by experts for experts**

50+ years redefining what's possible in specialty logistics.
