The generics purchasing program that strengthens your pharmacy, helping you find more time for patient care.

Maximize Value
Simplify Operations
Focus on Patient Care
You deliver the care your patients deserve. PRxO Generics® helps keep your pharmacy healthy.

PRxO Generics delivers economically competitive drug choices, value-improving solutions and performance-based incentives on a broad portfolio of generic drugs. Automated features combined with reliable and secure daily delivery simplify purchasing so you can focus on patient care.

- Competitive pricing helps you reduce costs.
- Available performance-based incentives grow with your commitment to the PRxO Generics formulary and help you make smart purchase decisions.
- Automated value-improving solutions simplify purchasing and reduce costs.
- Industry-leading service levels ensure you receive timely and secure daily delivery of the right drugs to help your patients.

Value-enhancing solutions help your pharmacy run smoothly, so you have more time for patient care.

Product Access solutions maintain reliable supply and save you time when an ordered item is out of stock.

- **Alternate Size Substitution** automatically substitutes an alternative size, incentive-eligible PRxO Generics equivalent item when the size of primary item ordered is out of stock.¹
- **PRxO Generics Select** extends the PRxO Generics formulary to include selected patient-preferred manufacturers.

Maximize Total Value by automatically substituting non-PRxO Generics items with PRxO Generics equivalents.

¹ This solution requires ACAP (Automatic Compliance Assurance Program). Not applicable in mixed use facilities.

* AmerisourceBergen reserves the right to modify PRxO Generics features at any time subject to group purchasing organization and contractual requirements, to the extent applicable. Contact your AmerisourceBergen representative for eligibility and participation questions. Participating pharmacies must comply with all applicable laws and regulations, including but not limited to reporting discounts and rebates on all reports and claims submitted to federal and state healthcare programs.
First to Shelf® helps you maximize performance and control patient costs by quickly converting branded prescriptions to newly-launched PRxO Generics products. Automated shipment of approximately two-weeks of supply, based on branded equivalent purchase history, helps you meet patient demand while limiting the potential for returns.

- **Reduce Drug Costs**: 5% discount on products shipped to your pharmacy.
- **Enhance Cash Flow**: 60-day extended dating.
- **Minimize Price Fluctuation Exposure**: 60-day price protection that absorbs longer-term fluctuations across two periods: launch through day 30; day 31 through day 60.
- **Maximize Value**: First to Shelf purchases speed transition from brand to generics and improve incentive-based performance.

**Manufacturer Switch Discount** automatically saves you 5% off the invoice price on replacement items during the 30 days following a permanent transition of a PRxO Generics primary item to a different manufacturer.

**PRxO Generics Sales Specialists** are generics experts available by phone to help you maximize the value you receive from the PRxO Generics purchasing program.

- **Frequent Live Communication** helps you operate at the speed of the generics market.
  - Identify purchase opportunities to help maximize overall generics purchase value.
  - Stay in tune with market changes including price decreases, loss of exclusivity and new product launches.
- **Quick and Convenient Access** to your PRxO Generics resource partner.

Contact your AmerisourceBergen Sales Executive for program details and to learn how PRxO Generics value-improving solutions can benefit your pharmacy.
The value of AmerisourceBergen

Leverage the full power of our integrated offerings and enhance the value you receive from AmerisourceBergen. We are committed to working together and delivering the therapies, services and data-driven insights you need to improve pharmacy efficiency and elevate the patient experience.
