CERTIO®

Dashboard overview

Inventory

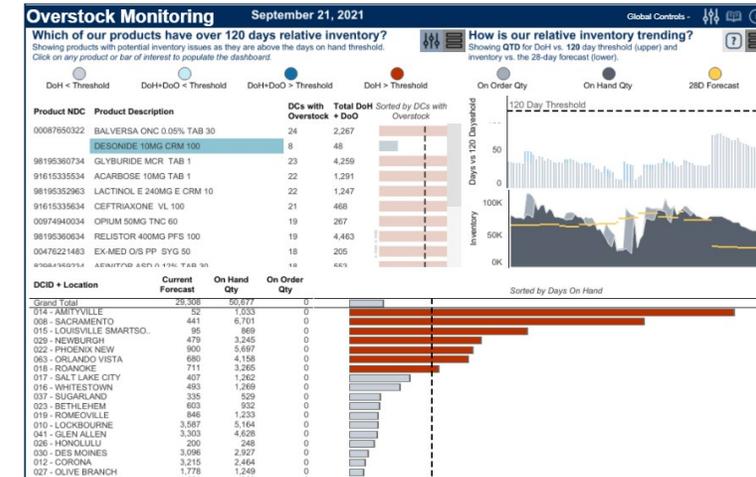

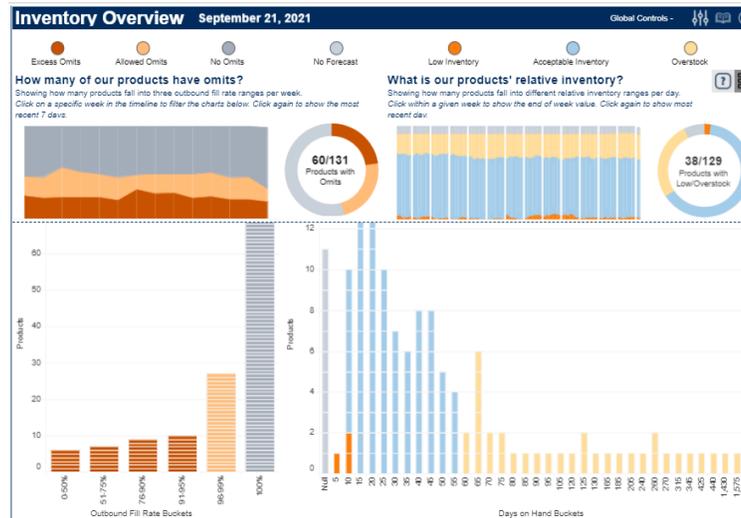

Purpose: improve inventory efficiency by minimizing omits & overstock.

Inventory Overview

- Provides quick visibility on overall inventory health
- Shows distribution of products' outbound fill rate and product relative inventory

Omit, stockout, overstock monitoring

- Provide visibility on products that may not have enough inventory to meet demand
- Enable identification of potential overstock in the network

Sales

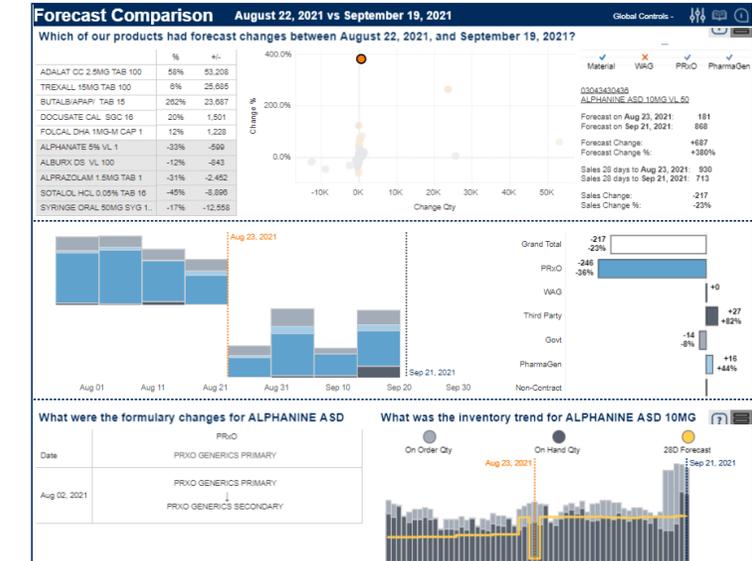

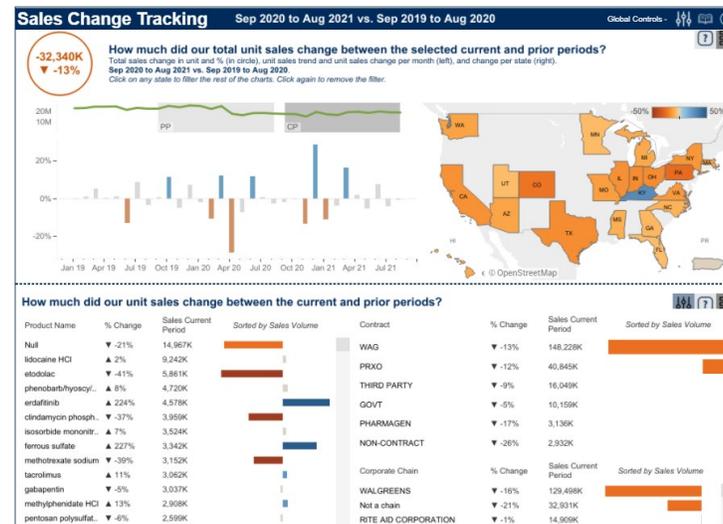

Purpose: monitor sales trends and forecast changes requiring immediate action.

Sales overview and change tracking

- Provide monthly view of sales and sales change
- Allow manufacturers to assess geographical, formulary, and customer impact on total sales

Forecast Comparison

- Allows quick identification of products with high forecast change
- Supports identification of forecast change drivers

Product Oversight

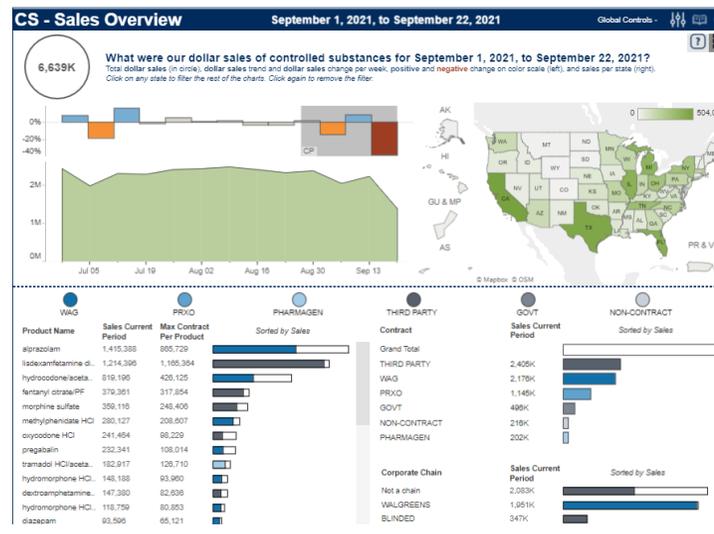

Purpose: provide manufacturers with dedicated visibility into sales of controlled substances

CS Sales Overview; CS Sales Tracking

- Provide dedicated view of controlled substances sales, including sales by customer state and product family
- Allow manufacturers to monitor change in sales for controlled substances

CS Reconciliation

- Provides manufacturers with detailed visibility of all controlled substances sales at invoice level
- Supports manufacturers in regulatory reporting

CS Reconciliation September 2021

Failure to Supply

Purpose: help manufacturers to manage service level and recognize potential occurrences of failure to supply

FTS Validation

- Provides manufacturers with visibility into historical sales and service level
- Supports validation of actual exposure for invoiced materials and quantities.

FTS Mitigation

- Provides manufacturers with visibility into current service level and fill rate
- Helps identifying materials and DC with highest number of missed lines and omits
