## Real-time prescription benefit and electronic prior authorization for Epic

### Prescription decision support with real-time, patient-specific information

CenterX Real-Time Pharmacy Benefit (RTPB) and Electronic Prior Authorization (ePA) are seamlessly integrated with your Epic EHR to provide your health system complete, patient-specific benefits data and a fully digital prior authorization (PA) workflow.

CenterX provides patient benefit information along with information customizable to your health system, such as the cost to your health plan and prices at your health system's pharmacies. These prescription decision support enhancements are available to your providers as well as to your transitions, meds-to-beds, and medication therapy management (MTM) teams.

CenterX empowers teams across your health system with expanded a configurable capabilities to help with initiatives that reduce cost and increase revenue, while helping **to improve medication accessibility for patients.**

### Advanced capabilities

Our advanced RTPB and ePA capabilities can expand your prescription decision support with data for medications with no days supply, pricing at onsite retail pharmacies, cost to health plans, and more.

### Simple and configurable

Our Epic native integration and App Orchard application are easily implemented to Epic environments and configured to match your existing workflows.

### 100% customer retention

Our health system customers trust us to build strong relationships and advocate on their behalf.

### Patient-specific RTPB

#### Patient eligibility

Did you know 25-50% of patient visits are missing verified pharmacy benefits information? *CenterX's focus on eligibility identification has helped health systems identify over 90% of patients.*

#### PBM connectivity

Does the data that your RTPB network return match the data requested? *CenterX tailors each PBM connection to correctly interpret and convey responses to providers.*

#### RTPB response

Epic-integrated RTPB with real-time, patient-specific data helps:

- improve cost transparency
- improve medication accessibility
- reduce drug spend

### Streamlined ePA

Is your time being wasted by unnecessary PAs? *CenterX only initiates those prior authorizations that are required with PBM-verified determination and forms.*

Do faxes derail your PA workflow? *CenterX digitizes faxes so providers can manage PAs entirely within the EHR.*

Streamlined ePA helps your health system:

- reduce administrative burden
- reduce treatment delays
- manage PAs with a consistent workflow across payers and PBMs

## Advanced real-time prescription benefit and electronic prior authorization for Epic

CenterX's prescription decision support solution offers patient-specific RTPB information and a streamlined ePA workflow seamlessly integrated with your Epic EHR. CenterX RTPB can be easily implemented as a stand-alone network or as an addition to an existing RTPB network to address data gaps.

The flexibility of the CenterX RTPB network and the customizations in our RTPB Extensions app in the **Epic App Orchard** help your providers when ordering prescriptions and empower your health system's transitions, meds-to-beds, and MTM teams.

**CenterX provides your health system with the RTPB and ePA features to help you achieve your health system's goals while providing accurate, patient-specific prescription information to help improve patient outcomes.**
