

Powering your practice with ABC Order

Designed hand-in-hand with our customers, ABC Order makes placing and managing your pharmaceutical orders simple so that you can get back to what's truly important – spending more time with patients.

A comprehensive platform that makes ordering, reporting and analytics easy and seamless across sites of care:

Real-time access

Get quotes, place orders, view your transaction history and more—whenever and wherever you need, 24 hours a day.

Easy ordering

Make a favorites list and access recently ordered items easily; reorder exactly what you ordered last time and avoid errors.

Optimize reimbursements

View product reimbursements and identify how your ordering choices impact your bottom line.

Customize for your needs

Set up the platform to suit your business. Create orders for multiple locations and customize permissions to allow others to access the specific tools they need.

Stay informed

ABC Central, an informative dashboard within ABC Order, keeps you up to date with new product announcements, recalls, and additional information that you need for your day-to-day operations.

Secure, organized payments

Receive and pay invoices, search past invoices, summary statements and reimbursement reports. Streamline your finances by scheduling payments and storing electronic wallets securely.

Robust and customizable reporting

With ABC Order-Reporting, a robust application within ABC Order, you can fully customize almost any report you can imagine and schedule it to automatically run at the frequency you need. Streamline your processes with quick access to frequent reports, recent report results, smart filters and regulatory reports.

Report templates include:

- Purchase detail report
- Purchase summary monthly report
- Product catalog report
- Drug reimbursement report
- Price changes report
- Lowest price by MBU report
- DSCSA report
- CSOS receipt audit report
- Manufacturer backorder report
- Key shortage report
